INSTRUCTIONS TO PUBLISHERS

Extreme care should be exercised to insure that the specifications for advertising to be set other than solid be definite, clear, and specific since no allowance will be made for paragraphing or for display or leaded or prominent headings, unless specifically ordered, or for additional space required by the use of type other than that specified. Specifications for advertising other than solid and the advertisement copy submitted to the publisher will be attached to the voucher. The following is a sample of solid line advertisement set up in accordance with the usual Government requirements.

DEPARTMENT OF HIGHWAYS & TRAFFIC.

THE UNITED STATES
ENVIRONMENTAL PROTECTION AGENCY

INVITES

PUBLIC COMMENT ON THE
GROUND WATER AND SURFACE WATER OPERABLE UNIT FEASIBILITY STUDY
SUPPLEMENT AND PROPOSED PLAN FOR THE

CHEROKEE COUNTY SUPERFUND SITE
GALENA, KANSAS SUBSITE

The U.S. Environmental Protection Agency (EPA) and the Kansas Department of Health and Environment (KDHE) invite public comment on the Ground Water and Surface Water Operable Unit Feasibility Study (OUFS) Supplement and the Proposed Plan for the Cherokee County site, Galena subsite.

The EPA, lead agency for the site, and KDHE, the support agency, will host a **Public Meeting** to discuss the Proposed Plan and receive comments on August 3, 1989, at 7:00 p.m. in the Galena Senior Citizens Center, 720 Wall Street, Galena, Kansas.

Additional field work and test work regarding the removal and treatment of surface mine wastes were conducted by the EPA and potentially responsible parties (PRPs) subsequent to the February 1988 release of the Agency's Proposed Plan and March 1988 OUFS. Results of this work led to a decision to reevaluate the 1988 preferred remedy and to develop and consider additional alternatives for remediation of the surface mine wastes. An analysis of these additional alternatives is provided in an OUFS Supplement. Based on a thorough evaluation of available data, the EPA and the Kansas Department of Health and Environment (KDHE) have developed a new proposed remedial plan that consists of the following four actions:

- Removal and selective placement of mine waste below the ground surface;
- Diversion of surface streams;
- Recontouring of land surface; and
- Investigation of deep aquifer wells.

The Proposed Plan, Operable Unit Feasibility Study (OUFS) Supplement report and the February 1988 OUFS report will be available for public review at the Galena Public Library and the EPA, Region VII, Library. Comments on the Proposed Plan and the OUFS Supplement should be sent to Glenn Curtis, EPA, Region VII, 726 Minnesota Avenue, Kansas City, Kansas 66101. Comments must be received by August 17, 1989. A decision regarding implementation of the Proposed Plan will be made after consideration of comments from the public.
